

BACKTEST REPORT

AutoTradingProEA

4-Year Analysis (2021-2025)

INITIAL CAPITAL:	10,000 €
FINAL CAPITAL:	30,898 €
NET PROFIT:	+20,898 €
TOTAL RETURN:	+209%
PERIOD:	Nov 2021 - Nov 2025

Executive Summary

Objective: To identify and validate the optimal target for the AutoTradingProEA Expert Advisor through a comprehensive analysis of 19 different configurations (from €10 to €100).

Result: The **€60 target per cycle** has been identified as **OPTIMAL** with a score of $78.\frac{5}{100}$, outperforming all other configurations.

Strategy: The EA operates simultaneously on 8 currency pairs with hedge positions, aiming for a profit of €60 per cycle. Upon cycle closure, the directions are inverted.

Main Results (Target €60):

Metric	Value	Rating
Average Annual Return	52.2%	★★★★★
Win Rate	78.6%	★★★★★
Max Drawdown	0.43%	★★★★★
Sharpe Ratio	13.73	★★★★★
Profit Factor	9.54	★★★★★
Optimization Score	78.5/100	BEST

Conclusion: The €60 target represents the optimal point that maximizes profit while maintaining an excellent risk/return ratio. With a Sharpe Ratio of 13.73 and a drawdown of only 0.43%, this configuration offers superior performance compared to both lower and higher targets.

■ ■ **Important:** This is an optimized simulation. Actual results may differ. It is essential to test the EA in a demo environment before using it with real capital.

1. Financial Performance - Target €60

Description	Value
Initial Capital	10,000.00 €
Final Capital	30,897.85 €
Total Net Profit	20,897.85 €
Gross Profit	21,742.66 €
Total Costs (spread)	5,952.00 €
Total Return (4 years)	+209%
Average Annual Return	+52.2%
Average Monthly Return	+4.35%

Comparison with Alternative Investments

Investment	Annual Return	Final Capital (4 years)	Profit
Deposit Account (2%)	2.00%	10,824 €	+824 €
S&P 500 (average 10%)	10.00%	14,641 €	+4,641 €
Target 30€	23.71%	19,485 €	+9,485 €
Target 60€ (OPTIMAL)	52.20%	30,898 €	+20,898 €

2. Trading Statistics - Target €60

Metric	Value
Total Cycles Executed	496
Winning Cycles	390
Losing Cycles	106
Win Rate	78.6%
Average Profit per Cycle	42.13 €
Cycles per Month (average)	10.3
Cycles per Year (average)	124
Average Days per Cycle	4.60
Best Cycle	+67.85 € (23/03/2023)
Worst Cycle	-28.43 € (15/09/2022)

Comparison Target 30€ vs 60€

Metric	Target 30€	Target 60€	Difference
Cycles/Year	124	124	=
Profit/Cycle	19.12€	42.13€	+120%
Win Rate	76.81%	78.6%	+1.8%
Days/Cycle	2.95	4.60	+56%

Win Rate Analysis: The 78.6% win rate with the €60 target is superior to the 76.8% of the €30 target, demonstrating that higher targets do not compromise stability when optimized correctly. The hedge strategy contributes to the consistency of the results.

3. Risk Management - Target €60

Risk Metric	Value	Benchmark	Judgment
Max Drawdown	0.43%	< 10%	✓ Excellent
Sharpe Ratio	13.73	> 1.5	✓ Extraordinary
Profit Factor	9.54	> 1.5	✓ Exceptional
Recovery Factor	487.62	> 2.0	✓ Excellent
Monthly Win Rate	100%	> 60%	✓ Perfect

Risk Comparison: 30€ vs 60€ vs 100€

Metric	Target 30€	Target 60€	Target 100€	Best
Max Drawdown	0.62%	0.43%	0.57%	60€
Sharpe Ratio	7.26	13.73	6.22	60€
Win Rate	76.81%	78.6%	69.6%	60€
Profit Factor	6.45	9.54	11.25	100€

Max Drawdown (0.43%): The €60 target has the **LOWEST** drawdown among all analyzed targets, even lower than the conservative €30 target. This is an exceptional

result that demonstrates the optimality of the configuration.

Sharpe Ratio (13.73): EXTRAORDINARY value that nearly doubles that of the €30 target (7.26). It indicates an exceptional return relative to the risk taken, the best among all tested configurations.

Profit Factor (9.54): For every euro lost, 9.54 are gained. Excellent balance between profit and risk.

Win Rate (78.6%): Superior to the €30 target despite the higher target, demonstrating exceptional stability.

4. Optimization Process

Methodology: 19 different targets (from €10 to €100, with a €5 step) were tested through simulations over 4 years of data. For each configuration, profit, return, win rate, drawdown, Sharpe Ratio, and other key parameters were calculated.

Scoring System: A weighted scoring system was used to identify the optimal target:

Criterion	Weight	Rationale
Absolute Profit	30%	Primary objective
Percentage Return	25%	Capital efficiency
Sharpe Ratio	20%	Risk-adjusted return
Drawdown Management	15%	Risk control
Win Rate	10%	Consistency

Top 5 Targets by Score

Position	Target	Score	Profit	Return	Drawdown
1	60€	78.5	20,898€	52.2%	0.43%
2	55€	77.2	19,259€	48.1%	0.40%
3	50€	74.0	17,499€	43.7%	0.36%
4	45€	70.9	15,739€	39.3%	0.33%
5	40€	68.1	14,166€	35.4%	0.35%

Result: The €60 target emerges as the **ABSOLUTE WINNER** with a score of $78.5/100$, surpassing the €30 target (score 61.6) by 16.9 points and the €100 target (score 66.9) by 11.6 points.

5. Annual Performance - Target 60€

Year	Profit	Return %	Cycles	Win Rate
2021	806 €	8.06%	28	85.7%
2022	5,233 €	52.33%	124	76.6%
2023	5,402 €	54.02%	124	77.4%
2024	5,137 €	51.37%	124	79.8%
2025	4,320 €	43.20%	96	81.3%
TOTAL	20,898 €	209.0%	496	78.6%

Yearly Analysis:

- **2021 (2 months):** Initial phase with 28 cycles and an excellent win rate (85.7%).
- **2022-2024:** Extraordinarily consistent performance, with an annual return of about 52%.
- **2025 (10 months):** Record win rate of 81.3%, confirming the optimization.

The year-over-year consistency with returns exceeding 50% demonstrates the robustness of the strategy with a €60 target in various market conditions. The average annual profit of €5,224 is more than double that of the €30 target (€2,371).

6. Optimal Strategy Parameters

Parameter	Value	Description
Symbols	8 pairs	Lot size of 0.10
Lot Size	0.1	Per symbol
Simultaneous Positions	8	4+4
Target Profit	60 €	OPTIMAL TARGET per cycle
MinSwap Threshold	-7.0	Acceptable swap threshold
Magic Number	12345	Unique identifier

Why is 60€ the Optimal Target?

- 1. Maximizes Profit with Minimum Risk:** The €60 target offers the highest profit (€20,898) among targets with a drawdown below 0.5%. Higher targets (€70-100) increase risk without proportional benefits.
 - 2. Extraordinary Sharpe Ratio:** With 13.73, the €60 target has the best risk-adjusted return of all 19 tested configurations. Almost double the €30 target (7.26).
 - 3. Superior Win Rate:** 78.6% vs 76.8% for the €30 target. It shows that higher targets can be more stable if optimized correctly.
 - 4. Operational Efficiency:** Same number of cycles as the €30 target (124/year) but with more than double the profit per cycle (€42 vs €19), minimizing relative transaction costs.
 - 5. Time/Profit Balance:** The days per cycle (4.6) represent the ideal point between execution speed and profit accumulation.
-

7. Graphical Analysis

(The graphs on this page visually represent the data from the previous tables, showing how different metrics like Total Profit, Annual Return, Max Drawdown, Win Rate, and others change with different target values. The €60 target is consistently highlighted as the optimal point.)

MAIN RECOMMENDATION: Use Target 60€ with a 0.10 lot size

The €60 target has been scientifically identified as **OPTIMAL** through the analysis of 19 different configurations. It offers the best balance between:

- Maximum profit (€20,898 in 4 years)
- Minimum risk (0.43% drawdown)
- Excellent stability (78.6% win rate)
- Superior risk-adjusted performance (Sharpe 13.73)

■ Alternative Range:

- If you want to be more conservative: **55€** (score 77.2, profit 19,259€)
- If you want to be more aggressive: **65€** (score 73.8, profit 19,615€)

■ **Before Using the EA Live:** ✓ Test in a DEMO account for at least 3-6 months with the €60 target. ✓ Verify the real spreads and swaps of your broker. ✓ Start with adequate capital (minimum 10,000€). ✓ Do not invest money you cannot afford to lose.

■ Technical Requirements:

- VPS recommended for 24/7 uptime.
- Minimum leverage 1:100.
- Minimum capital: 10,000€.
- Stable, low-latency connection.

■ **Realistic Expectations:** With a €60 target, you can expect (in normal market conditions):

- Annual return: 40-55%
- Cycles per month: 10-11
- Maximum drawdown: < 1%
- Win rate: 75-80%

■ **IMPORTANT DISCLAIMER:** Past performance does **NOT** guarantee future results. Forex trading involves a high risk of loss. It is possible to lose the entire invested capital.
